After months of a national effort to paint elections in Wyoming (and elsewhere) as fatally flawed, and after weeks of efforts to make a voter ID law somehow fit our state, please put this bill out of its misery.

The League of Women Voters of Wyoming opposes this measure and asks Senate Corporations to vote "no" today.

The only accomplishment of HB75 is to create a hoop for voters and poll workers to jump through on Election Day, with no corresponding benefit. Our voter registration system is solid. Our elections are secure. Our turnout is disappointing, and it seems an extra hoop doesn't do anything but possibly make that worse.

If we want to increase confidence of Wyoming voters in their elections, we could start by all standing up and attesting to the fact we don't have a problem with impersonations at the polls.

Voter ID is a hoop for its own sake, and Wyoming should have no patience for such a waste of time, effort and other resources.
